We Are Back!!!!!!!

CATO BOD is happy to announce that the CATO launches will resume on June 20th in Durham. Lamont is now allowing public gatherings up to 50 people. As COVID is still a major concern, the CATO BOD has implemented rules to ensure social distancing and other precautions to ensure the health and safety of our members. This is new to everyone, so please be patient as we try these new regulations. Hopefully this is all temporary, but only time will tell.

If you feel sick and/or displaying symptoms, PLEASE stay home. There will be other launches.

All the precautions listed below are mandatory. No exceptions. Sorry to sound harsh, but we are in unique times. If you cannot abide by these, you will be asked to leave.

1. As you park, markers are placed along each side of the road 15’ apart. This is your “safe” area. Please keep your vehicles between the stakes.
2. Please respect other people’s safe areas. We are a social club, but please use discretion.
3. There WILL be a fliers meeting
4. There will not be signs at the roads. We have a limit of 50 people max and we are not encouraging spectators
5. There will not be food served. Please bring your own food and beverages
6. There will be a porta potti, please take extra care as this is a public field
7. We will not be using flight cards. Shout out when your rocket is ready to launch.
8. Access to the RSO will be via a cattle chute system with cones placed every 6 feet. Please maintain social distancing. Please be courteous of the RSO. He will be touching every rocket.
9. Masks are mandatory in the chute and areas inside the flight line, especially near the pads
10. Hand sanitizer will be placed on a table on your way out to the pads. Please sanitize your hands on the way out to the pads. We cannot be sanitizing the launch equipment. Feel free to use on the way out if you choose.
11. There will be 3 low power racks and 3 mid / high power pads. Only one person or family is allowed at a rack or a pad at a time. We will be loading all three racks simultaneously to keep things moving as needed.
12. Masks will be worn at the flight line
13. Below is a contact form that replaces our normal sign up sheet. Please fill out the form prior to your arrival or in your designated area and drop them in the box by the RSO table. The extra information is for COVID tracking in case someone is infected.
14. We are restricted to 50 people max. Please limit non fliers so we can accommodate as many fliers as possible. Phase 3, which hopefully will be in place by our next launch, will allow up to 100 people.

We realize that these restrictions are not ideal, but we must follow the guidelines set by the state of Connecticut. I am sure that our neighbors on the hill will not be happy to see us back and I will not be surprised if we get a visit by authorities. If we cannot show we are following and exceeding the state guidelines, then we will be shut down.
### CATO Launch 282 : June 20, 2020
